CYBERHIGHROLLER SYSTEM

Its called the "Cyber high roller system" Its a repeating # system. It isn't the best system I've ever seen but if the #'s are repeating, you can win a lot. The system: 1st spin - watch, no bets 2nd spin - bet on number that came up on spin #1 3rd spin - bet on the 2 numbers that came up last 2 spins. 4th spin - bet on the 3 numbers that came up last 3 spins. 5th spin - bet on 4 numbers that came up last 4 spins. Spins 6 through 13 - continue as above. If a number repeats you have won that series and start over at spin #1. If you reach spin # 13 without a repeat you will be betting on 12 different numbers. Use the following progression. 1, 1, 1, 1, 1, 1, 1, 2, 2, 3, 4, 6 Bets 1 through 7- 1unit Bets 8 & 9- 2 units Bet 10- 3 units Bet 11- 4 units Bet 12- 6 units Total 208 units Second part of this system is called common sense. 1. You do not have to bet entire series, you can stop after bet #9 with a loss of 62 units. 2. If you are ahead then go for entire 12 bets 3. Set a maximum, say 500. The author claims he plays it as follows: Using on-line casinos with a $1 minimum. His unit is $1 1.Deposit $62 with casino. 2.Play the system to 9th bet. If he loses loss is $62 3. If winning, when total bank reaches $162 he withdraws $62. 4. Continues to play on winnings until he has $200. At that point he withdraws another $100. 5. Continue as above until goal is reached. ($500)

Why casino executives fight mathematical gambling systems

Casino Gambling Software: Baccarat, Blackjack, Roulette, Craps, Systems, Basic Strategy

Software for Lottery, Lotto, Pick 3 4 Lotteries, Powerball, Mega Millions, Euromillions, Keno, Horse Racing, Blackjack, Roulette, Baccarat, Sports Betting, Gambling, Probability, Odds, Statistics, Mathematics
